### CAREER SUMMARY

#### Senior Information Security Analyst, GRC

*Avanade | September 2021 to Present*

- Review data privacy laws and regulations to identify applicable information security and data privacy requirements.
- Analyze security procedure violations and developed plans to prevent recurrence.
- Ensures adequate and effective IT controls exist to meet applicable current and future security compliance requirements found in laws, regulations, frameworks such as FFIEC, PIPIDA, GLBA, SSAE 16/18 SOC I & II, ISO 27001/27002, ISO 27701, NIST, etc.
- Engage stakeholders and assist them with the evaluation of information assets, applications, systems, products, and services ability to meet data privacy by design and information security requirements.
- Actively contribute to information security policies & standards, control objectives and program investments to maintain compliance with regulatory, contractual and internal requirements.
- Experience with industry recognized risk assessment frameworks, identify appropriate risk remediation options, track risks to closure and, where applicable, integrated additional requirements into existing assessments.
- Conduct root cause analysis on risks and identify appropriate remediation in accordance with industry-recognized frameworks and standards.
- Prepare and deliver executive level reporting metrics providing status of data privacy risks, remediation measures, and trends.

#### Quality Control Analyst

*Madigan Army Medical Center | August 2018 to September 2021*

- Provide system application maintenance, system performance monitoring, and problem resolution.
- Monitors studies and patient information by reviewing mismatched folders, correcting mismatched studies by using other systems to obtain correct demographic information, and corrects studies that are received with errors incomplete.
- Perform full architecture repairs (link/unlink studies, phantom QA issues, remove scanned documents and reports, recover deleted images, reset image count, migrate/archive/compress, etc.).
- Cooperate with IT, to assure that system monitoring, and effective back-up procedures are followed: develop and provide regular maintenance on various functions of the PACS system.
- Working knowledge of MHS Genesis EHR, FUJI Synapse PACS, and Powerchart RIS.
